

Advanced Searching on the WWW Sites & Tools

Here is a list of good places to start searching for topics on the World Wide Web. Also check out the PC Center's web page at www.carnegielibrary.org/locations/pccenter/links.html for more links.

To Open One of These Web Sites:

1. Double-click on the *Internet Explorer* icon to start access to the WWW.
2. Put the mouse pointer in the *Address Bar*. When the mouse pointer becomes an "I", click once. This will highlight the current URL or web address.
3. Type in the address for the web site you want to visit. The address is the second line of the places listed below. Be careful not to make any typos. You must be exact as though you were dialing a phone number.
4. Press the *Enter* key on the keyboard. This sends the computer on its way!

Remember to Try the Advanced Search Tools:

Phrase Searching – Search for keywords in an exact order, usually uses quotation marks around the phrase. *Example:* “Three Rivers Stadium”

Boolean Operators – Use the words AND, OR, & NOT to combine keywords to narrow or broaden the search. *Example:* Pittsburgh AND penguins

Wildcard Characters – Search for all forms of a root word, usually uses the * or ? symbols. *Example:* class*

Proximity Operators – Uses the terms NEAR and ADJ to find keywords close to each other. *Example:* education NEAR reform
